Mr. Chris Monrad  
Monrad Engineering  
1926 East Ft. Lowell Road, Suite 200  
Tucson, Arizona 85719-2391

Dear Chris:

Sensitive, Responsive, Proactive, Innovative. These are the unique hallmarks of Monrad Engineering we have experienced during more than 15 years of working with you.

Monrad Engineering is sensitive in understanding and achieving the goals and aspirations of the project as well as its basic needs. Architectural goals are embraced and enhanced. Energy goals are not just met, but exceeded, keeping in mind the real needs of the people who will use the facility. The spirit as well as the requirements of the dark skies initiative are sensitively addressed in enhancing the overall quality of the project.

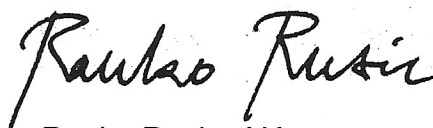

Monrad Engineering is responsive. Outstanding work is always completed on time. You communicate well, not just listening, but making sure you understand. You are easy and enjoyable to work with.

Monrad Engineering is very proactive and diligent. You ask questions, even addressing issues outside of your immediate scope, always adding value to the project and the process.

You are innovative in your design and your approach. Your lighting designs always work and always go beyond merely being functional. Real options are presented, discussed, and evaluated.

Monrad Engineering is the best electrical design and engineering consultant we have worked with. We look forward to working with you again.

Sincerely,

Ranko Ruzic, AIA  
Design Principal
